## **Review of Operating Procedures**

Operating Procedures Revision Date (The date of the most recent review or revision of operating procedures):

15-Nov-2008

Yes

#### Training

Training Revision Date (The date of the most recent 18-Jun-2009 review or revision of training programs):

#### The Type of Training Provided

Classroom: Yes
On the Job: Yes
Other Training:

#### The Type of Competency Testing Used

Written Tests:

Oral Tests: Yes
Demonstration: Yes
Observation: Yes

Other Type of Competency Testing Used:

#### Maintenance

Maintenance Procedures Revision Date (The date of 15-Nov-2008 the most recent review or revision of maintenance procedures):

Equipment Inspection Date (The date of the most recent equipment inspection or test):

13-Apr-2009

Equipment Tested (Equipment most recently inspected or tested):

All process equipment including tanks, compressors, belts, motors, pipes, pumps, valves, pressure sensors, vapor lines, shutoff valves, cutoffs, unloading, etc.

#### Management of Change

Change Management Date (The date of the most recent change that triggered management of change procedures):

Change Management Revision Date (The date of the most recent review or revision of management of change procedures):

18-Jun-2009

Plan Sequence Number: 55763

#### **Pre-Startup Review**

Pre-Startup Review Date (The date of the most recent pre-startup review):

05-Nov-2008

### **Compliance Audits**

Compliance Audit Date (The date of the most recent 18-Jun-2009 compliance audit):

Compliance Audit Change Completion Date (Expected or actual date of completion of all changes resulting from the compliance audit):

11-Nov-2009

#### **Incident Investigation**

Incident Investigation Date (The date of the most recent incident investigation (if any)):

Incident Investigation Change Date (The expected or actual date of completion of all changes resulting from the investigation):

#### **Employee Participation Plans**

Participation Plan Revision Date (The date of the most recent review or revision of employee participation plans):

18-Jun-2009

#### Hot Work Permit Procedures

Hot Work permit Review Date (The date of the most 18-Jun-2009 recent review or revision of hot work permit procedures):

## **Contractor Safety Procedures**

Contractor Safety Procedures Review Date (The date of the most recent review or revision of contractor safety procedures):

18-Jun-2009

Contractor Safety Performance Evaluation Date (The date of the most recent review or revision of contractor safety performance):

#### **Confidential Business Information**

CBI Claimed:

Plan Sequence Number: 55763

# **Executive Summary**

Skyview Cooling Company¿s (Yuma, Arizona) accidental release prevention policy involves a unified approach that integrates technologies, procedures, and management practices. All applicable procedures of the EPA Prevention Program are adhered to. Skyview Cooling Company¿s emergency response policy involves the preparation of response plans which are tailored to the facility and to the emergency response services available in the community. It is also in compliance with the EPA Emergency Response Program requirements.

The Skyview Cooling Company facility in Yuma utilizes anhydrous ammonia as a refrigerant in their precooling, cold rooms and process water chilling operations. Fresh produce is brought from the fields and cooled to remove field heat. The produce is then stored in a cold storage warehouse. The facility holds 15,000 pounds of anhydrous ammonia for the refrigeration process.

The general accidental release prevention program is based on the following key elements:

- ¿ Training of the operators.
- ¿ Preventative maintenance program.
- ¿ Use of state-of-the-art process and safety equipment.
- ¿ Use of accurate and effective operating procedures.
- ¿ Performance of a process hazard analysis of equipment and procedures.
- ¿ Implementation of an auditing and inspection program.

Chemical specific prevention steps including awareness of the hazardous and toxic properties of these toxic substances.

No accidental releases of anhydrous ammonia have occurred at this facility in the past five years.

Skyview Cooling Company will fully implement the RMP and will initiate appropriate changes as needed to maintain a safe operation.

The emergency response program includes an emergency response notification plan. Emergency response drills and drill evaluations are conducted once every year; emergency operations and response procedures are also reviewed at that time.
